PRODUCT CATALOG

The company «Medok» was established in 2009 in Kharkiv (Ukraine) on the basis of the Kharkov regional association of beekeeping. At the moment, we are a family-owned company engaged in the production, processing and sale of natural honey, bee products and products for beekeepers. Our main apiary is located in the village of Zelena Levada on the banks of the Yuzhny Bug River in the Nikolaev region and has 300 bee families.

We pay special attention to the processing, research, progression and promotion of bee products. Under our own brand, we produce a wide range of natural and high-quality functional foods and medical cosmetics with bee products. Many of our products are unique and patented in Ukraine. The quality and effectiveness of our apiproducs have been repeatedly confirmed at international conferences on beekeeping and apitherapy.

Due to the presence of a branded retail chain (stores in Kharkov and Kiev, an online store), we follow our mission every day and strengthen the human health by bee products.

«Medok» company invites new partners for mutually beneficial cooperation. Our products have excellent quality and affordable prices. We offer:

- Bee products for the pharmaceutical, cosmetic and food industries
- Functional foods and medical cosmetics with bee products to expand the range of pharmacies, herbalist shops, healthy food stores, beekeeping shops, supermarkets, etc.
- Production of functional food and medical cosmetics with bee products under your brand
- Goods for beekeepers

The company «Medok» produces a wide assortment of bee products for use in the pharmaceutical, parapharmaceutical, cosmetic and food industries:

- ◆ **Beeswax**
- ◆ **Propolis**
- ◆ **Bee pollen**
- ◆ **Perga (bee bread)**
- ◆ **Royal jelly lyophilized**
- ◆ **Drones larvae gomogenated raw**
- ◆ **Drones larvae gomogenated lyophilized**
- ◆ **Zabrus**
- ◆ **Tincture of wax moth larvae**
- ◆ **Dead bees**
- ◆ **Tincture of dead bees**

The company «Medok» produces a wide assortment of natural honey. The main honey plants of Ukraine:

- **Acacia**
- **Linden**
- **Buckheat**
- **Rape**
- **Coriander**
- **Forest plants**
- **Steppe plants**

Packing: 200 gr, 380 gr, 500 gr, 1400 gr, 15 kg, 300 kg

The company «Medok» sells a wide range of goods for beekeepers:

- **Beekeeping equipment**
- **Equipment for queen breeding**
- **Bee medicine**
- **Protective clothing**
- **Beeswax combs foundation**
- **Beehives, frames**
- **Honey packaging**
- **Beekeeping and apitherapy literature**

ROYAL JELLY

Ingredients: lyophilized bee royal jelly – 100%

Natural bee royal jelly is made by glands of working bees. Lyophilized bee royal jelly is natural bee royal jelly dried by freezing at the temperature of minus 30°C during 24 hours. Royal jelly contains proteins, 22 amino acids, carbohydrates, fats, vitamins, enzymes, mineral substances, growth stimulators, sex hormones.

Use: prophylactics or alleviation of diseases of urogenital system, of gastrointestinal tract, of thyroid gland, of cardiovascular, vein and endocrine systems. It shows immune-stimulating, antiseptic, antioxidant, anti-inflammatory, hepatoprotective action.

DRONES LARVAE HOMOGENATED

Ingredients: lyophilized drones larvae homogenate – 100%

Drones larvae homogenate is received by way of extraction from honeycombs and grinding of drone brood (seven-day drones larvae). Lyophilized drones larvae homogenate is natural drones larvae homogenate dried by freezing at the temperature of minus 30 °C during 24 hours. Drones larvae homogenate contains carbohydrates, raw protein, fats, vitamins (α -tocopherol, β -carotene, B1, B2, B3, B5, B6), indispensable amino acids (tryptophan, phenylalanine, methionine, lysine, valine, threonine, isoleucine, leucine, histidine, arginine), mineral substances, sex hormones (testosterone, estradiol).

Use: prophylactics or alleviation of diseases of immune and endocrine systems, digestive organs, urogenital system in men (androgen deficiency, prostatitis, adenoma), female and male infertility, metabolic disorder. It is indicated for patients after long forced hypodynamia, for sportsmen during intensive training process and in the recovery period (enlarges speed and force indicators), and for increase of physical activity for aged people.

BEE POLLEN

Ingredients: bee pollen – 100%

Bee pollen is grains of flower pollen (male sex cells of flower plants) which bees gathered and rolled into small pieces, having added flower nectar and secret of their glands. Bee pollen brought by bees is gathered on the entry to the hive with the help of pollen traps. Bee pollen contains high-value proteins, lipids, vitamins, 27 mineral substances, amino acids (including all indispensable), desaturated fatty acids, carbohydrates, enzymes, hormones, growth stimulators, natural phenol compounds, phytoncids.

Use: prophylactics or alleviation of diseases of cardiovascular, nervous, endocrine and urogenital systems, normalization of work of gastrointestinal tract. It has immune-protective and antioxidant action. It is indicated for recovering patients after long forced hypodynamia, for sportsmen during intensive training process and in recovery period, and also for increase of physical activity for aged people.

PERGA (BEE BREAD)

Ingredients: perga (bee bread) – 100%

Perga (bee bread) is made by bees from flower pollen (bee pollen) which they bring to the hive and put in perga honeycomb. Then they add to the pollen honey and their enzymes, a reaction of lactic acid fermentation begins and the pollen turns into perga. Perga contains proteins, 16 amino acids, carbohydrates, enzymes, vitamins, mineral substances, water, wax, lipids, hormones.

Use: prophylactics or alleviation of diseases of nervous, endocrine, immune, cardiovascular, urogenital systems and gastrointestinal tract. It has antioxidant, anti-microbe, choleric, diuretic and hepatoprotective action. It contributes to strengthening of the immunity, increases tonus and physical endurance of the organism. It is used at pregnancy, in after-birth period for increase of lactation. It is recommended to children for prophylactics of cold and infectious diseases, improvement of work of gastrointestinal tract and decrease in tiredness.

TINCTURE OF WAX MOTH LARVAE

Ingredients: liquid extract from larvae of big wax moth 20%, additive agent: water-alcohol solution 39%.

Phytoconcentrate (tincture) from larvae of the wax moth is made from fresh (without signs of pupation) of larvae of the big wax moth (*Galleria Mellonella*) by way of their maceration in 39% water-alcohol solution. The tincture contains enzymes, high-molecular proteins, peptides, nucleotides, xanthine and hypoxanthine, serotonin-like substances, steroid hormones, microelements, vitamins, 20 amino acids, enzyme “serine protease”.

Use: prophylactics or alleviation of diseases of cardiovascular (stenocardia, atherosclerosis, myocardial infarction, apopleptic attack, coronary heart disease, myocarditis, vegetative-vascular dystonia, thrombophlebitis), respiratory (bronchitis, bronchial asthma, allergy, pneumonia), urogenital and immune systems, and of tuberculosis.

TINCTURE OF DEAD BEES

Ingredients: liquid extract from dead bees 10%, additive substances: water-alcohol solution 39%.

Phytoconcentrate (tincture) from dead bees is made from healthy bees that died at the honey farm in natural way by maceration of ground dead bees in 39% alcohol solution. The tincture contains chitosan, melanin complexes, heparoids, amino acids, peptides, bee poison, mineral substances.

Use: prophylactics or alleviation of diseases of urogenital system, of gastrointestinal tract, of thyroid gland, of cardiovascular, vein and endocrine systems. It shows immune-stimulating, antiseptic, antioxidant, anti-inflammatory and hepatoprotective action.

TINCTURE OF PROPOLIS

Ingredients: liquid extract from propolis 10%, additive substances: water-alcohol solution 39%.

Phytoconcentrate (tincture) from propolis is made by way of extraction of natural propolis in ethanol (alcohol). The tincture contains resins, wax substances, flavones, essential oils, pollen, mineral substances, vitamins, proteins, amino acids, aromatic substances.

Use: prophylactics or alleviation of diseases of mouth cavity, respiratory system (sore throat, tonsillitis, bronchitis, pharyngitis, highmoritis, otitis), urogenital system and gastrointestinal tract. It has expressed antiseptic (anti-bacterial, anti-virus and anti-fungi) action. It stimulates regeneration of tissues.

SUPPOSITORIES WITH BEE PROPOLIS

Ingredients: extract of propolis, extract of buttons of black poplar, extract of chamomile flowers, extract of calendula flowers, essential oil of clary sage, bee wax, fatty base.

Rectovaginal suppositories with propolis are made from natural components with high biological activity, which make astringent, deodorant, wound-healing and resorbing action. The unique receipt of the suppositories provides a high treatment and prophylactic effect from co-use of propolis and phytocomponents.

Use: urology (prostatitis, urethritis, prostate adenoma, sexual disorders, urinary stone disease, states after surgery on the prostatic gland and the urinary bladder), gynecology (colpitis, whites, endocervicitis, cervical erosion, myomas, fibromyomas), proctology (hemorrhoids, fissures and polyps of the colon). Suppositories with propolis are active relating to chlamydia, mycoplasmas, gardnerella vaginalis, trichomonas, candidas.

SUPPOSITORIES WITH ROYAL JELLY

Ingredients: lyophilized bee royal jelly, natural sea-buckthorn oil, additive substances: hydrophilic base, lanoline.

Rectovaginal suppositories with royal jelly are made from natural components with high biological activity, which make immune-stimulating, antiseptic, antioxidant, anti-inflammatory, wound-healing and hepatoprotective action. The unique receipt of the suppositories provides a high treatment and prophylactic effect from co-use of royal jelly and sea-buckthorn oil.

Use: prophylactics or alleviation of diseases of urogenital system, of gastrointestinal tract, of thyroid gland, cardiovascular, nervous, vein and endocrine systems, enforcement of the immunity, evacuation of toxins, rejuvenation of the organism, recovery after childbirth, surgeries and hard diseases. They are effective at hemorrhoids.

SUPPOSITORIES WITH HOMOGENATED DRONES LARVAE

Ingredients: lyophilized homogenated drones larvae, wheat germ oil, additive substances: hydrophilic base, lanoline.

Rectovaginal suppositories with homogenated drones larvae are made from natural components with high biological activity. The unique receipt of the suppositories provides a high treatment and prophylactic effect from co-use of homogenated drones larvae and wheat germ oil.

Use: prophylactics or alleviation of diseases of immune, cardiovascular and endocrine systems, gastrointestinal organs, urogenital system in men (androgenic deficiency, prostatitis, adenoma), female and male infertility, metabolic disorders. They are indicated at hemorrhoids, disorders of locomotor apparatus, psychic disorders, for increase of libido.

GEL-BALM ON DEAD BEES

Ingredients: extract of dead bees, water, gelation agent.

The main active ingredient of dead bees is chitosan complex, which consists of glucosamine, melanin, heparoids, bee poison, acetic acid. Chitosan activates healing of burn and wound surface without formation of cicatrices, and at putting on the wound, it has blood-stopping and analgesic effect. Heparoids suppress inflammatory processes, stabilize blood pressure, and improve the state of blood creating systems and vessels.

Use: It is recommended at mastitis, panaris, varicosity, thrombophlebitis, joint pains, burns, concussions, hematomas, stretching, pains in dorsal spine.

ELIXIR WITH PROPOLIS AND HERBS

Ingredients: extract-concentrate of propolis 50%, extract-concentrate: of pharmacy chamomile 5%, of tickseed 5%, of calendula 5%, of plantain 55, of peony 5%, of valerian 5%, of sage 5%, of St.-John's wort 5%, of milfoil 5%, of mint 5%.

Elixir with propolis has a unique receipt and contains exclusively natural components that provide its high effectiveness for prophylactics and treatment of diseases of mouth cavity and respiratory system. It does not contain alcohol.

Use: It is recommended for preparation of applications at tooth-ache, of mouth rinse for daily hygiene at tooth caries, diseases of gums (gingivitis), inflammations of the mouth cavity (stomatitis, periodontitis, abscesses), wounds of mucous membranes of mouth and tongue, implant placing, candidiasis of mucous membrane of mouth cavity, diseases of the respiratory system, for strengthening of gums and removal of unpleasant smell from mouth, after extraction of teeth and removal of tartar, for prophylactics of caries and decrease of teeth sensitivity.

SPRAY WITH PROPOLIS AND HERBS

Ingredients: extract-concentrate of propolis 10%; extract-concentrate: of chamomile 10%, of calendula 10%, of nettle 10%, of plantain 10%, of sage 10%, of St.-John's wort 10%, of oak 10%, of mint 10%, of celandine 5%, of pine 5%.

The unique receipt of the spray combines propolis and a big number of active phytocomponents that makes it natural and effective means for hygiene of the mouth cavity, prophylactics of cold and inflectional diseases. It does not contain alcohol.

Use: It is recommended for disinfection and daily hygiene at caries of teeth, diseases of gums (gingivitis), inflammations of the mouth cavity (stomatitis, periodontitis, abscesses), wounds of mucous membranes of mouth and tongue, implant placing, candidiasis of mucous membrane of mouth cavity, for strengthening of gums and removal of unpleasant smell from mouth, after extraction of teeth and removal of tartar, for prophylactics of caries and decrease of teeth sensitivity, at colds and diseases of throat (sore throat, pharyngitis, laryngitis, trachitis).

BEESWAX

Ingredients: apiarian purified beeswax – 100%.

Use: When applied to the skin, it feeds, cleanses, and rejuvenates effectively. It is used in home medicine and cosmetology when preparing balms, ointments, creams etc.

PROPOLIS

Ingredients: propolis (bee glue) – 100%

Use: It has expressed antiseptic (anti-bacterial, anti-virus and anti-fungi) action. It stimulates regeneration of tissues. It is used in home medicine for preparation of tinctures, ointments etc.

DEAD BEES

Ingredients: dead bees (dried dead bees) – 100%

Use: It is recommended to the ration of nutrition for prophylactics or alleviation of diseases of urogenital system, gastrointestinal tract, thyroid gland, cardiovascular and vein systems. It is used in home medicine for preparation of tinctures, decoctions, ointments etc.
